

On research visibility, reach, and impact: a cook's tour

Outline

1. Identifier
2. Writing for a broader audience
3. Tracking attention
4. Media comment
5. Tracking impact
6. Questions

ORCID

ORCID is a free, unique, persistent identifier (PID) for individuals to use as they engage in research, scholarship, and innovation activities. Learn how ORCID can help you spend more time conducting your research and less time managing it.

The Conversation

The Conversation is a network of nonprofit media outlets publishing news stories and research reports online, authored by academics with professional journalist editors to produce accessible research-informed outputs. Articles are written by academics and researchers under a Creative Commons licence, allowing reuse without modification. Copyright terms for images are generally listed in the image caption and attribution. Its model has been described as explanatory journalism.

[The Conversation](#) Australia and New Zealand gets about 7.1 million page views onsite and in Apple News, and 11.3 million page views including republication, each month.

What do we publish?

Timely, evidence-based, plain English analysis of issues in the news

New research with significant findings for our broad, mainly non-academic [audience](#)

Timeless ‘explainers’ or analysis pieces, answering interesting questions based on research evidence

The Conversation

Story

In one sentence, what will your article say? *

50 word limit

Why does the general public need to know about this and why now? *

100 word limit

What key points and examples will you use to support your argument?

150 word limit

Do you or your co-authors have any conflicts of interest we should know about? These include a financial stake in a company or product you'd be writing about, membership of a political party or advocacy body, or anything else that might affect your perceived objectivity with readers.

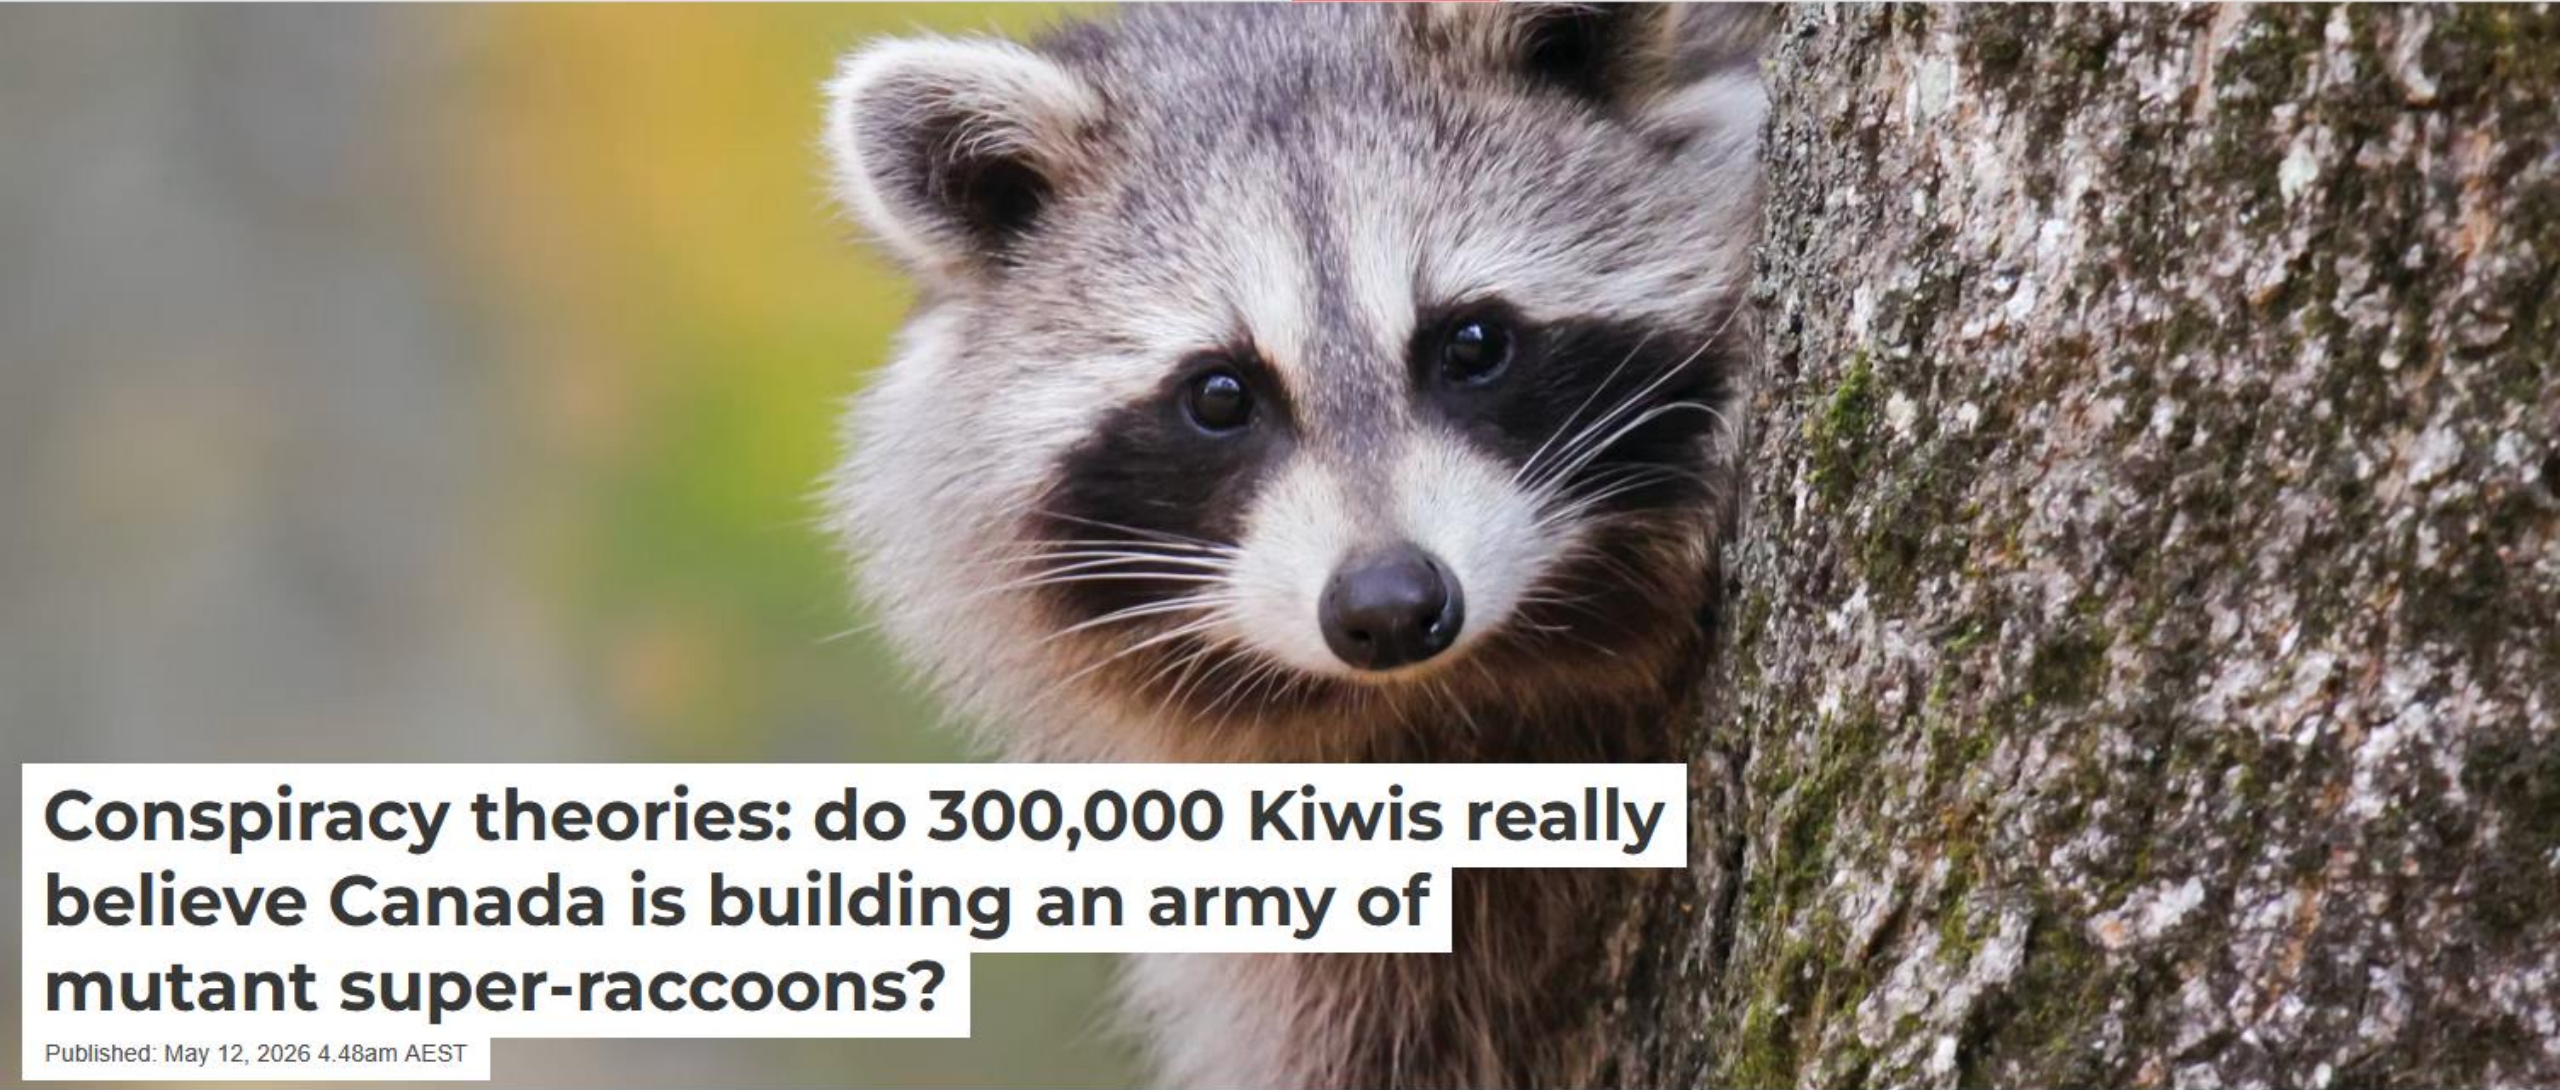

200 word limit

Please select the most appropriate section for your pitch *

- ☐ Arts + Culture
- ☐ Books and Ideas
- ☐ Business + Economy

Reveal online attention to research at speed

Thousands of conversations about research happen online every day. Altmetric tracks and captures a range of online attention sources to published research across social media, news outlets, policy and more. We collate this activity, to help you monitor, report and showcase the attention surrounding the research you care about.

DR

Mathew Marques

ID 0000-0002-5486-650X

BIO

Dr Marques uses social psychology to understand the role of psychological mechanisms (e.g., trust, conspiracy theories, ideologies) in the formation of attitudes towards socially contentious scientific research (e.g., genetically modified foods, vaccinations), and more broadly in science communication. He is also interested in the role of epistemological processes such as anti-intellectualism in the evaluation of emerging technologies, and how these and other values shape judgments of scientific actors. Mathew also researches the tall poppy syndrome, and the effects of differing status and aspects such as deservingness on attitudes towards tall poppies and underdogs. Dr Marques is an expert in quantitative modeling techniques such as multilevel modeling and various forms of structural equation modeling.

Mathew is an Associate Editor for the Journal of Social Psychology, part of the Social Science Advisory group at the National Centre for Immunisation Research and Surveillance, and a member of the Society of Australasian Social Psychologists, and International Society of Political Psychology.

How we connect you to journalists

Create a public profile on Scimex

Join our 'Find an Expert' database on Scimex so that journalists can get in touch when your subject hits the headlines. You can specify which types of media you're comfortable doing, and showcase your communication skills directly to journalists.

Create a public profile →

One quote is all it takes

When a story breaks, the AusSMC sources expert comments to inform reporting as it happens. These Expert Reactions feature in news stories across all major news outlets. They are also shared through the global network of Science Media Centres.

Another reason to sign up →

Is your big paper about to be published?

It might be suitable for an online media briefing, giving you the chance to explain the work directly to journalists. Contact us to pitch your idea.

Let us know →

Got a media release?

Your media team can upload media releases on your work to our science news portal, Scimex.

Visit Scimex.org →

Got a hot tip or need advice?

If there is a story on the horizon or an issue bubbling away in your area of science, please contact us. We'd love to have an off-the-record chat with you.
